The HomeSmart Smart Home

The HomeSmart Smart Home encompasses a whole range of product categories - from door locks and doorbells to lighting and curtains - and condenses them into one unified smart home system.

Integrate your lights, switches, air-conditioners, curtains, cameras, and locks into the smart home platform of your choice to unlock new ways of controlling the devices in your home. Enjoy the convenience of app control, sensor automations, wireless switches, and voice control. Benefit from remote offsite controls and notifications; stay secure and informed, no matter where you are.

Configure and create scenes to achieve different ambiances and atmospheres with your smart devices. Adjust brightness, colours, and white colour temperatures with your smart lighting; control temperatures with your air-conditioners; manage curtain positions; and more. Scenes can be triggered by app, voice, or on a time schedule.

Create unlimited automation possibilities with sensors, time, or geolocations - all configured with your smartphone. With HomeSmart, creating your smart home is simple, affordable, and accessible.

Proven Products

Innovative, reliable products used by millions worldwide, including major tech markets like the USA, EU, and China.

Guidance and Planning

With a portfolio of over 6,000 Singaporean homes, we leverage our extensive experience to plan the perfect solution for yours.

Expert Tech Support

As an official Aqara integrator with years of expertise, we pride ourselves on providing top-tier technical support to our clients.

Warranty Coverage

Our warranty covers most of our products for two years, reflecting our confidence and providing you with peace of mind.

Works Without Internet

No internet? No problem. Core smart functions will continue to work without Wi-Fi or internet.

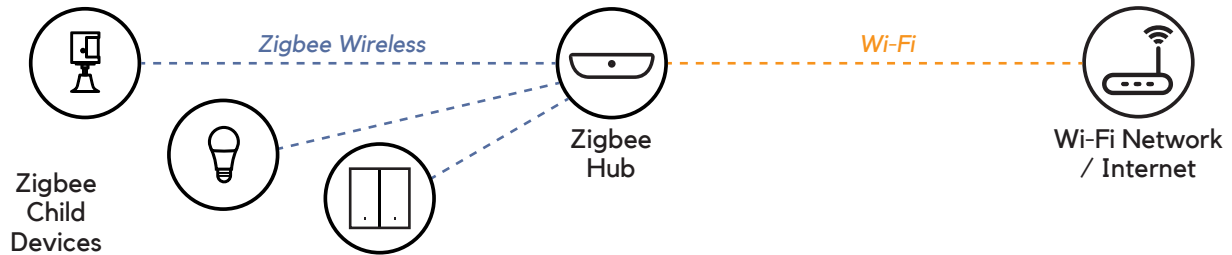

Easy to Configure

Adding devices, setting up scenes and configuring automations are easy, and can be done in minutes in your app.

Smart Home Hubs

Smart hubs are the central gateway between your smart devices and your home network. Sensors, switches, lights and other "child devices" connect wirelessly to a hub, which then connects to your router via **Wi-Fi** or **Ethernet**. Most hubs are multi-function devices. Larger homes may require multiple hubs.

The diagram below shows how these devices connect, using **Zigbee** as an example. Thread works similarly.

As Aqara smart home hubs are generally multi-function devices, product information can be found in the product listings in the rest of this catalogue. This table shows an overview of the hub choices.

	Hub M3	Hub M300	Hub M200	Camera Hub G5 Pro (PoE)	Camera Hub G5 Pro (Wi-Fi)	Camera Hub G350	Camera Hub G2H Pro	Hub M100	Hub M1S Gen 2	Panel Hub S1 Plus	Video Doorbell G410
Zigbee Hub	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Matter Controller	Yes	Yes	Yes	Yes	Yes	Yes	-	Yes	-	-	Yes
Thread Border Router	Yes	Yes	Yes	Yes	Yes	Yes	-	Yes	-	-	Yes
Smart Aircon Control	Yes	-	Yes	-	-	-	-	-	-	-	-
Ethernet Port	Yes, PoE	Yes, PoE	Yes, PoE	Yes, PoE	-	-	-	-	-	-	-

How to use this catalogue?

Look out for tags on every product picture. They tell you the protocols each product supports.

	Connects directly to your home Wi-Fi network.
	Acts as a Thread Border Router — the bridge that connects Thread devices to your network.
	Acts as a Zigbee Hub — the bridge that connects Zigbee devices to your network.
	Child device that connects via Thread. Needs a Thread Border Router to work.
	Child device that connects via Zigbee. Needs a Zigbee Hub to work.

Single-purpose Hubs

Aqara Hub M100

Entry-level Matter Controller, featuring a compact form factor and flexible placement with its USB-A port for power. Works both as a Thread Border Router and as a Zigbee Hub. Connects to your network via 2.4GHz Wi-Fi. Supports Wi-Fi 6.

Aqara Hub M1S Gen 2

A Zigbee hub with a built-in 2-pin plug that can be plugged directly into a power socket. Also doubles as a decorative or night light with its RGB LED ring on the circumference. Built-in 2-watt speakers can also be used for alarms, doorbells, alerts, or notifications. Only supports 2.4GHz Wi-Fi.

Aqara Hub M300

Professional-grade hub that unifies Matter, Zigbee, Thread, KNX, BACnet, and Modbus devices, managing up to 500 devices from a single dashboard. Pairs with Aqara Studio Connect for local, no-code automation that keeps running even when the internet goes down.

Smart Air-conditioner Controllers

Smart air-con controllers use infrared (IR) to send commands to your air-conditioner, effectively replacing your physical remote controllers. As IR beams cannot pass through walls or glass, these devices must be placed within the same room as your air-con.

Aqara Hub M3

Flagship smart home hub with edge computing — automations can run locally even without internet. Supports hub clustering for multi-hub homes. Built-in IR emitter for air-con control. Up to 128 Zigbee and 128 Thread devices. Dual-band Wi-Fi, Ethernet with PoE.

Aqara Hub M200

Smart home hub with multiple protocol support and connectivity options. Built-in 360° IR for air-con and fan control. Up to 40 Zigbee and 40 Thread devices. Dual-band Wi-Fi, Ethernet, PoE. Powered via USB-C.

Smart Appliances

Smart appliances are devices that bring convenience and comfort throughout the house, offering automated and convenient solutions for traditional, daily routines.

Aqara Laundry Rack C100

A ceiling-mounted motorised laundry rack that looks like a flat lighting panel when not deployed, with a main 40W lighting and a separate 18W ambient warm light. When needed, it deploys its racks, and lifts 35kg of wet laundry at the tap of a remote, voice command, or app.

Aqara Pet Feeder C1

Smart pet feeder that dispenses kibble or treats for your pet on automations, schedules, or on command. Create schedules directly in app, including portion sizes and timing; or manually trigger food dispensing remotely.

Aqara Bathroom Heater T1

Works as a smart light, ventilation fan, and heater. A 2800W heating element can heat up a bathroom. Can also be used as a ventilating fan with its included ducts to keep air fresh in your bathroom. Includes a Bluetooth remote. 330×580×90mm (body). 300×600mm (panel).

Smart Security Cameras

Monitor your home with real-time streaming, or keep footage in the cloud, SD cards, or internal storage (G5 only). These cameras provide remote notifications and two-way communications. All cameras support Apple HomeKit Secure Video, Google Home, and Alexa.

Apple HomeKit Secure Video

All Aqara cameras support HomeKit Secure Video — Apple's standard for private, encrypted camera storage. Footage is processed on your Apple devices and stored in your iCloud account, so no one else can access your recordings. Not using Apple? These cameras also work with Android devices with the Aqara app, Google Home, or Alexa.

End-to-end encrypted

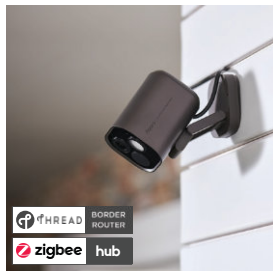

No subscription needed

Stored in your iCloud

View in Apple Home app

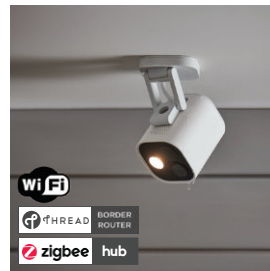

Aqara Camera Hub G5 Pro (PoE)

IP65-rated with True Colour Night Vision and a spotlight. Built-in 32GB storage. Supports RTSP / DVR / NAS. Has an ethernet port for wired connections / PoE, and a USB-C port for power. No Wi-Fi.

Available in White or Shadow Grey.

Resolution	View Angle	Storage (eMMC)	Pan&Tilt
2K 1520p	133°	32 GB	No, Fixed View

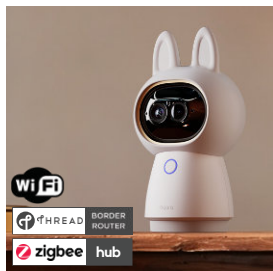

Aqara Camera Hub G5 Pro (Wi-Fi)

IP65-rated with True Colour Night Vision and a spotlight. Built-in 32GB storage. Supports RTSP / DVR / NAS. Powered via a USB-C port (5V2A). Supports 2.4/5GHz Wi-Fi (No ethernet port).

Available in White or Shadow Grey.

Resolution	View Angle	Storage (eMMC)	Pan&Tilt
2K 1520p	133°	32 GB	No, Fixed View

Aqara Camera Hub G350

4K dual-lens indoor camera with 9x hybrid zoom and 360° pan-tilt. Also a hub (80 devices). Matter v1.5 certified. Auto-tracking, facial recognition, physical privacy lens. Apple HomeKit Secure Video, Alexa, Google Home.

Resolution	View Angle	Storage (SD Card)	Pan & Tilt
4K 2160p	133°	Max. 128 GB	Yes, 360° View

Aqara Camera Hub G2H Pro

Inconspicuous camera with multiple recording options, including SD card, cloud storage, or NAS. Full app control and real-time streaming through 2.4GHz Wi-Fi. Built-in stand to adjust where you need it to face. Easy to mount.

Resolution	View Angle	Storage (SD Card)	Pan & Tilt
HD 1080p	146°	Max. 512 GB	No, Fixed View

Aqara Camera E1

Indoor camera with pan/tilt controls and Wi-Fi 6 support (2.4 GHz only). AI-enabled to recognize people, allowing for tracking and automations. A privacy mode rotates the camera to point away, such as at a wall.

Resolution	View Angle	Storage (SD Card)	Pan & Tilt
2K 1296p	101°	Max. 512 GB	Yes, 360° View

Aqara Camera G100

Indoor/outdoor IP65-rated. 2K resolution and Wi-Fi 6 support (2.4 GHz only). Basic local AI detections to detect humans; advanced Cloud AI available with subscription. Record to SD card, NAS, or Cloud services.

Available in White or Black.

Resolution	View Angle	Storage (SD Card)	Pan & Tilt
2K 1296p	140°	Max. 512 GB	No, Fixed View

Smart Video Doorbells

Aqara Video Doorbell G410

Doorbell camera with an outdoor camera unit (six AA batteries, or wired to 12V power) and an indoor chime (USB-C powered). Works as a multi-protocol hub. Wide, **landscape** view with mmWave sensor.

Available in White or Black.

Resolution	View Angle	Storage (SD Card)	Pan & Tilt
2K 1536p	175°	Max. 512 GB	No, Fixed View

Aqara Video Doorbell G400

2K wired video doorbell with 165° ultra-wide **portrait** view. Local AI person detection. Suitable for outdoor usage with IP65 weatherproof rating. Requires power (no battery options); supports ethernet / PoE.

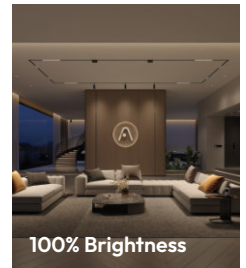

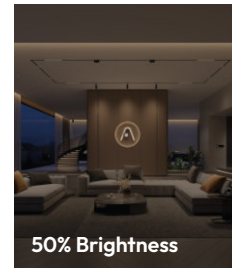

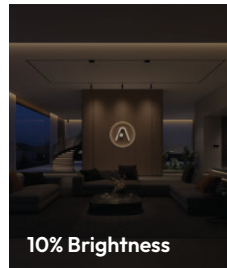

Resolution	View Angle	Storage (SD Card)	Pan & Tilt
2K 1200p	165°	Max. 512 GB	No, Fixed View

Smart Lights

Brightness Controls

Adjust your lights to the perfect brightness for any occasion - brighten them for remote meeting, or dim them for a movie. Use a smart knob switch to dial in the ideal level, or control them directly from your smartphone. Each smart light can be individually dimmed, or you can create light groups for easier control.

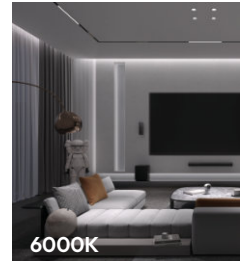

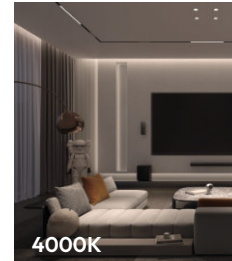

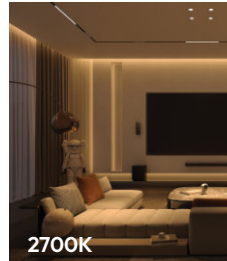

All Aqara Smart lights have brightness controls.

Colour Temperature Controls

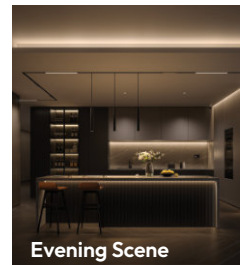

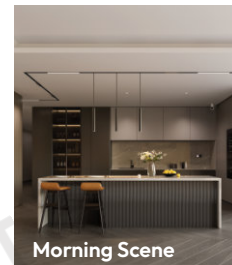

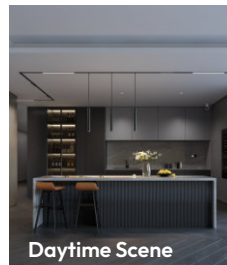

Enjoy complete flexibility in adjusting your lights from warm to cool - ranging from 2700K to 6000K. Warm lights, with its naturally yellowish hue, emulates a setting sun, creating a relaxing atmosphere in the evening. Cool lights, which look more bluish or white, emulates the midday sun and helps you stay focused on tasks.

All Aqara Smart lights can adjust from 2700K to 6000K.

Scenes & Automations

Create custom scenes for your home using our range of smart lighting and smart switches. An evening scene can dim your smart lights and turn it to a warmer hue, and turn off other lights connected by smart switches. Scenes can be integrated into Apple Home, Google Home, and Alexa, giving you simple, seamless ways of activating them - including by voice. Scenes can also be automated by time.

Built-in LED Strips

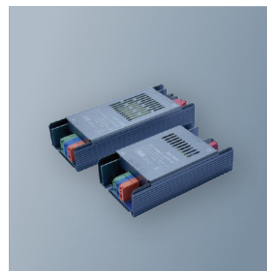

Aqara LED Strips require three components - a 24V driver, the Aqara LED Strip Smart Module, and the LED strip(s). LED Strips can be cut to your desired length, or extended up to 10 metres by splicing. Each module can be controlled individually in app.

Aqara LED Strip Smart Module

Smart module that can control up to 10 metres of LED strips, offering adjustable brightness and colour temperature controls. To be used with Aqara LED strips. Requires an appropriate 24V driver.

2700K - 6500K

24V LED Driver

Required to provide power to the Aqara LED Strip Smart Module, which in turn provides power to the Aqara LED Strips. Required wattage depends on the length of LED strips and their respective wattage per metre.

Available in 60W / 100W / 200W

Aqara SMD LED Strips T2

SMD LED strips with fine control of brightness and white spectrum. Achieves a very high brightness of up to 1000 lumens per metre. Individual LEDs may appear as "dots" on the strip.

10 metres per roll

12 W/m

2700K - 6500K

Aqara COB LED Strips T1

COB LED strip with a seamless, uninterrupted design, perfect for use in areas where the light strip will be exposed. Achieves brightness of up to 760 lumens per metre.

5 metres per roll

8 W/m

2700K - 6500K

The Aqara LED Strip T1, with its RGB colours, simple DIY installation, and included 3-pin plug, is listed under Retail Bulbs and Strips on the next page.

Downlights and Spotlights

Aqara Downlight T2 Pro

Recessed, studio-grade smart spotlights with CRI Ra96 for true-to-life colours. All models have white trims.

Reflector Colours: Matte White / Glossy Black
Beam Angles: 15° / 24° / 36° / 60°
Cut-out Sizes: 75mm / 55mm sizes

12 / 8 W 2700K - 6000K

Aqara Downlight T2 Pro Trimless

Recessed, smart spotlights for a seamless ceiling finish with no visible trims. CRI Ra96.

Reflector Colours: Matte White / Glossy Black
Beam Angles: 24° / 36° / 55°
Cut-out Sizes: 75mm / 55mm sizes

12 / 8 W 2700K - 6000K

Aqara Downlight T2 Lite

Recessed, smart spotlights with frosted core for soft, glare-free illumination. CRI Ra90. All models have white trims.

Reflector Colours: Matte Black
Beam Angles: 15° / 24° / 36° / 80°
Cut-out Size: 75mm

10 W 2700K - 6000K

Aqara Surface-Mounted Downlight T1

Downlights for universal installations. Maximum of 650 lumens, with deep dimming technology. Available in Black or White.

Beam Angles: 24° / 36° / 60°
Size: 86 mm x 71 mm

10 W 2700K - 6500K

Ceiling Lights

Aqara Ceiling Light H1

Ultra-slim ceiling lights in three sizes, each with a CRI of Ra 98, and featuring a separate backglow light to softly illuminate the ceiling.

45W: ø400 mm x 35 mm
55W: ø500 mm x 35 mm
135W: 960 x 620 x 48 mm

45 / 55 / 135 W 2700K - 6500K

Aqara Ceiling Light TIM

Consists of a main white spectrum light providing general illumination, and an RGB LED ring around the circumference providing functions for mood and dynamic lighting.

32W: ø395 mm x 80 mm
40W: ø495 mm x 75 mm

32 / 40 W 2700K - 6500K RGBIC

Retail Bulbs and Strips

Aqara LED Bulb T2 (RGB CCT)

Smart LED Bulb that supports both Thread and Zigbee. Fully Matter-compatible. Available in E27 and GU10 bulbs; simply install into light fixtures.

E27: 10.5W; 1100 lumens
GU10: 4.9W; 450 lumens

4.9 / 10.5W 2000K - 9000K RGB

Aqara LED Bulb T2 (CCT)

Smart LED Bulb that supports both Thread and Zigbee. Fully Matter-compatible. Available in E27 and GU10 bulbs; simply install into light fixtures.

E27: 10.5W; 1100 lumens
GU10: 4.9W; 450 lumens

4.9 / 10.5W 2700K - 6500K

Aqara LED Strip T1

Smart LED strip with addressable RGB lights, dynamic effects, and music sync mode. Plug and play with the included 3-pin plug.

Available in 2-metre kits and 1-metre extensions, sold separately - max 10m.

5 W/m 2700K - 6500K RGBIC

Aqara LED Bulb T1

Based on the commonly found E27 bulb size, this smart bulb can be simply screwed into existing light fixtures. Common fixtures include floor lamps, table lamps, and pendant lights. Outputs 806 lumens.

8.5 W 2700K - 6500K

Dimmer Drivers

Aqara Constant Current Driver T2 (15W)

Integrate traditional non-smart dimmable lights to your smart home, enabling brightness and colour temperature adjustments if supported by the light. Works with most LED lights up to 15W. Configurable output from 150 mA to 400 mA.

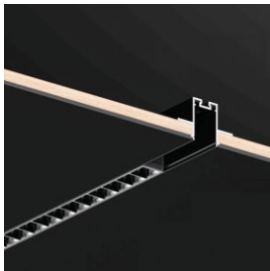

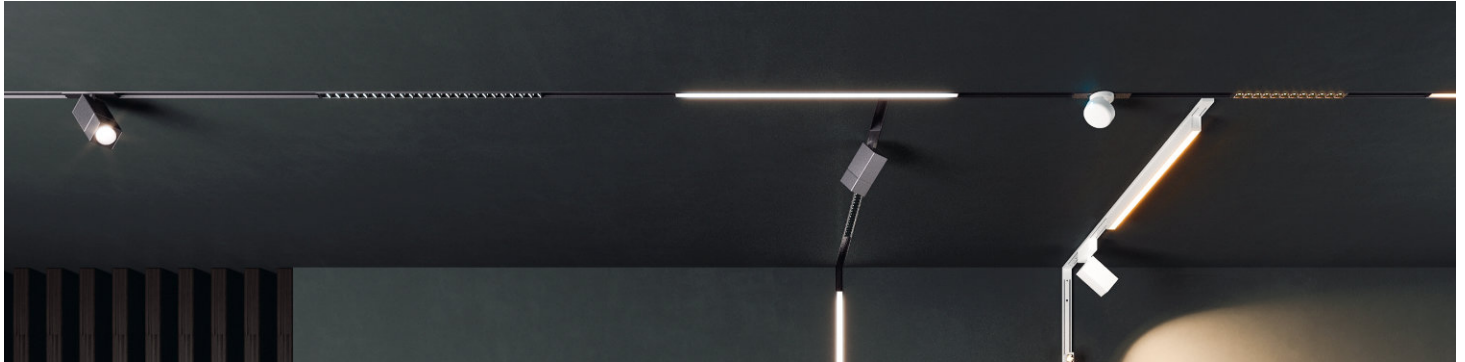

Aqara Constant Current Driver T2 (24W)

Integrate traditional non-smart dimmable lights to your smart home, enabling brightness and colour temperature adjustments if supported by the light. Works with most LED lights from 15W to 24W. Configurable output from 400 mA to 650 mA.

Magnetic Track Lights V1 Series

Meant for professional installation into ceilings and walls, giving you a fully customizable lighting solution. Select different smart light modules for different areas and purposes. All smart lights are individually controllable with brightness and tunable whites. Can also be grouped, even across tracks.

Aqara Recessed Tracks V1

Recessed tracks for installation into false ceilings. Seamless, flush appearance. Lights from the Aqara Magnetic Track Lights V1 Series can be installed on the track. Requires a 48V driver to power the track. *Only available in Grey.*

Aqara Surface-Mounted Tracks V1

Ultra-slim surface-mounted tracks for installation on solid ceilings - only 7.2 mm thick. Lights from the Aqara Magnetic Track Lights V1 Series can be installed on the track. Requires a 48V driver to power the track. *Available in Grey or White.*

Aqara Floodlight V1 (30 cm)

This floodlight delivers 600 lumens of bright, even illumination. Wide 100° beam angle ensures excellent coverage for lighting up smaller areas. 300 × 22.6 × 35.4 mm
Available in Grey or White.

12 W 2700K - 6000K

Aqara Floodlight V1 (60 cm)

This floodlight is designed for larger areas, offering a powerful 1200 lumens of light. Wide 100° beam angle provides broad and uniform illumination. 600 × 22.6 × 35.4 mm
Available in Grey or White.

24 W 2700K - 6000K

Aqara Grille Light V1 (12 Lights)

Compact grille light featuring 12 individual lights, delivering a combined 720 lumens. 28° beam angle makes it perfect for highlighting specific areas. 241 × 22.6 × 35.4 mm
Available in Grey or White.

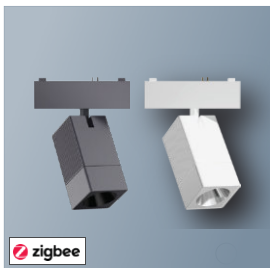

12 W 2700K - 6000K

Aqara Grille Light V1 (24 Lights)

Meant for larger installations - features 24 lights outputting 1440 lumens. 28° beam angle is ideal for accentuating key areas. 474 × 22.6 × 35.4 mm
Available in Grey or White.

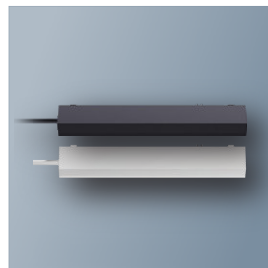

24 W 2700K - 6000K

Aqara Spotlight V1

This spotlight delivers 720 lumens of bright, focused illumination with a 24° beam angle. Ideal for highlighting specific objects or architectural details. 146.8 × 110 × 50 mm
Available in Grey or White.

12 W 2700K - 6000K

Aqara Track Driver V1

This 48V driver is required to power your tracks, delivering power to all lights installed on the track. 100W: 24 cm
200W: 30 cm
Available in Grey or White.

Aqara IoT Adapter V1

Mount suitable Aqara devices on your ceiling by powering them with the Magnetic Tracks V1. This IoT adapter converts the 48V power on the track into 5V with a USB-C power output and a multi-device mount. Includes an 18 cm USB-C to USB-C cable. 151 × 32 × 22 mm
Available in Grey or White.

Magnetic Track Lights H1 Pro Series

Similar to the V1 series in many ways, but different in others. While there are more lighting options for the H1 Pro series, there are no options for white tracks or lights - all products are only available in black. Surface-mounted tracks are also not of the ultra-slim profile. The H1 Pro and V1 series are not interchangeable.

Aqara Recessed Magnetic Tracks H1 Pro

Recessed tracks for installation into false ceilings. Seamless, flush appearance. Lights from the Aqara Magnetic Track Lights H1 Pro Series can be installed on the track. Requires a 48V driver to power the track, which in turn powers the lights.

Aqara Surface-Mounted Magnetic Tracks H1 Pro

Surface-mounted tracks for installation on solid ceilings. Lights from the Aqara Magnetic Track Lights H1 Pro Series can be installed on the track. Requires a 48V driver to power the track, which in turn powers the lights.

Aqara Spotlight H1 Pro

Designed for targeted illumination with a 24° beam angle. Adjustable head allows for precise positioning, perfect for accentuating artworks or features. Excellent for creating visual impact.

106 × 48 × 171 mm

10 W 2700K - 6000K

Aqara Tiltable Grille Light H1 Pro (6 lights)

This tiltable grille light comes with six lights each with a 36° beam angle, allowing for flexible lighting arrangements and perfect for creating zones of light.

117.5 × 22 × 103 mm

6 W 2700K - 6000K

Aqara Grille Light H1 Pro (6 lights)

A versatile 6-light grille configuration, designed to offer focused yet soft-edged lighting with a 36° beam angle. Perfect solution for areas needing discrete light.

113 × 22 × 43 mm

6 W 2700K - 6000K

Aqara Grille Light H1 Pro (12 lights)

This larger grille model provides a balance of light across a wider area, with a beam angle of 36°. Excellent for environments that require consistent, directed light.

221 × 22 × 43 mm

12 W 2700K - 6000K

Aqara Floodlight H1 Pro (30cm)

Optimized for wide-area illumination, this 30cm floodlight provides sweeping light coverage with a beam angle greater than 100°. Ideal for open spaces where broad, uniform light is needed.

303.5 × 22 × 43 mm

8 W 2700K - 6000K

Aqara Floodlight H1 Pro (60cm)

Engineered for extensive reach, with a 16W output that casts a wide and even light thanks to its >100° beam angle. Particularly well-suited for illuminating large areas.

603.5 × 22 × 43 mm

16 W 2700K - 6000K

Aqara Polarized Light H1 Pro (22cm)

This 10W polarized light module is specifically designed for wall washing, delivering a uniform beam that enhances wall textures and reduces glare.

221 × 22 × 46 mm

10 W 2700K - 6000K

Aqara Pendant Light H1 Pro

Featuring a slender design, this pendant light provides a 24° beam angle for placement above tables, counters, or workspaces. Its hanging feature adds aesthetic value while focusing light exactly where it's needed.

106 × 40 × 1475 mm

10 W 2700K - 6000K

Magnetic Track Driver

This 48V driver is required to power your tracks, delivering power to all lights installed on the track.

100W: 24 cm

200W: 32 cm

Smart Switches

Wired switches replace your traditional switches with smart on/off controls. Fits standard wall/switch boxes. Neutral versions support 'decoupled mode' with Aqara Smart Lights. **Wireless switches** are battery-powered — control lights, curtains, or scenes from anywhere. Mount on walls, tables, or counters.

V1 Series

Aqara Touchscreen Dial V1

Rotary dial with haptic feedback and a touchscreen. Control Aqara devices by rotating the dial (select brightness or CCT on screen). Swipe the screen to cycle through other lights or groups. Screen displays time or weather when idle.

Wired (up to 2-gangs). Requires **neutral**.

Aqara Display Switch V1

Switch with four physical buttons and a 2.08" customizable LCD screen. Each button can be labelled with text that matches the device it controls or the scene it activates. Screen displays time or weather when idle, and activates with proximity.

Wired (up to 2-gangs). Requires **neutral**.

S1 Series

Aqara Panel Hub S1 Plus

Wall panel with a 6.9" customizable touch screen to control multiple devices and trigger scenes. Features a photo gallery, proximity activation, and Aqara camera video streaming – including video doorbells. Requires a **neutral** wire.

*Black: black side profile; wired (up to 3-gangs).
White: white side profile; wired (up to 2-gangs).*

Aqara Panel Switch S100

Touchscreen panel with a customizable screen – control various smart devices, such as lighting and curtains, or activate scenes. Control smart light brightness and white spectrum.

Available in black or white (only side profile).

Wired (up to 3-gangs). Requires **neutral**.

H2 Series

Aqara Light Switch H2

Matter-compatible smart switch, consists of a 55mm switch module with a white 86 x 86 mm frame (white/grey multi-gang frames avail. separately; white/grey buttons included).

Wired. Use with or without a neutral wire.

Top buttons wired; bottom buttons wireless.

*Available in 2-button or 4-button versions
(wired 1-gang and 2-gangs respectively)*

Aqara Dimmer Switch H2

Smart dimming dial that can adjust non-smart wired dimmable lights, using leading or trailing edge dimming. Fits standard 55 mm frames; can also fit into standard 86 mm x 86 mm switch boxes.

Wired (1-gang). Use with or without neutral.

White | 1-gang

Aqara Dimmer Switch H2

Smart dimming dial that can adjust non-smart wired dimmable lights, using leading or trailing edge dimming. Fits standard 55 mm frames; can also fit into standard 86 mm x 86 mm switch boxes.

Wired (1-gang). Use with or without neutral.

Grey | 1-gang

Z1 Pro Series

Aqara Smart Switch Z1 Pro

A smart switch with wired gangs on the right, and a wireless slider for dimming your Aqara smart lights on the left.

Classic, timeless white that always works.

Wired. Works with or without a neutral wire.

White | 1-gang 2-gang 3-gang 4-gang

4-gang version features three wired gangs. The bottom gang is a wireless button that supports single, double, and long press.

Aqara Smart Switch Z1 Pro

A smart switch with wired gangs on the right, and a wireless slider for dimming your Aqara smart lights on the left.

Sleek, modern black with a subtle sheen.

Wired. Works with or without a neutral wire.

Black | 1-gang 2-gang 3-gang 4-gang

4-gang version features three wired gangs. The bottom gang is a wireless button that supports single, double, and long press.

H1 Series

Aqara Smart Switch H1

Premium smart wall switch with a metal frame and a sophisticated tactility. Gives your lights or fans smart, on/off controls. Plain white, simple and timeless. Goes well on white concrete walls.

Wired. Available in Neutral or No-Neutral.

White | 1-gang 2-gang 3-gang

Aqara Smart Switch H1

Premium smart wall switch with a metal frame and a sophisticated tactility. Gives your lights or fans smart, on/off controls. Champagne gold, with a light, minimalist hue. Perfect with wood carpentry or laminates.

Wired. Available in Neutral or No-Neutral.

Gold | 1-gang 2-gang 3-gang

Aqara Smart Switch H1

Premium smart wall switch with a metal frame and a sophisticated tactility. Gives your lights or fans smart, on/off controls. Dark grey, slightly warm. Provides a good contrast to light interiors.

Wired. Available in Neutral or No-Neutral.

Grey | 1-gang 2-gang

Aqara Smart Switch H1

Premium smart wall switch with a metal frame and a sophisticated tactility. Gives your lights or fans smart, on/off controls. Very dark, cool black. Sleek, elegant appearance.

Wired. Available in Neutral or No-Neutral.

Black | 1-gang 2-gang 3-gang

Aqara Smart 20A Switch H1

Smart wall switch with support for up to 20A – perfect for water heaters, cooker hoods, washing machines, or other appliances – and giving the connected appliance smart on/off controls.

Wired. Requires a neutral wire.

White | 1-gang

Aqara Wireless Knob Switch H1

Wireless switch with a rotary dial. Adjust your Aqara smart light brightness by rotating the knob – configure in app. Also supports single, double, long press, and press-and-rotate.

Wireless. 2 x CR2450; 3-year battery life.

White

Aqara Wireless Switch H1

Wireless version of the H1 White with a similar appearance – but flat on the back. Features multiple actions (single, double, long press) – each can be configured to control other smart devices or run scenes.

Wireless. 1 x CR2450; 5-year battery life.

White | 2-gang

D1 Series

Aqara Smart Switch D1

Wired wall switch designed to bring smart controls to your existing lights and fans via Zigbee. Features tactile feedback, with actual travel and a spring mechanism. Classic white.

Wired. Available in Neutral or No-Neutral.

White | 1-gang 2-gang 3-gang

Aqara Smart Switch D1

Wired wall switch designed to bring smart controls to your existing lights and fans via Zigbee. Features tactile feedback, with actual travel and a spring mechanism. Refined grey.

Wired. Available in Neutral or No-Neutral.

Grey | 1-gang 2-gang 3-gang

Aqara Wireless Switch D1

Wireless switch designed to be identical to the Wired version. Multiple actions (single, double, long press) to control other smart devices. Can also run scenes.

Wireless. 1 x CR2032 battery; 2-year battery life.

White | 1-gang 2-gang

Smart Controllers

Smart devices that are designed to bring smart control to non-smart appliances, or wireless devices to bring about more ways of interacting and controlling your smart home.

Smart Relay Modules

These smart modules can be used in a variety of applications - usually in false ceilings, behind switches, or in other hidden placements. They work to give the connected devices smart on/off controls; or, in the case of the T2, dry-contact control.

Aqara Dual Relay Module T2

Dual channel relay controller with options for wet or dry contacts, or interlock mode. Can be used to control a variety of existing devices, including gate motors, curtain motors, lights, switches, and sockets, with a maximum of 10A in wet contact mode.

Requires neutral wire.

Aqara Single Switch Module T1

Single channel relay controller with flexible installation options. Can be installed into switch wall boxes, light fixtures, or in false ceilings as a relay for existing wiring, with a maximum of 10A (neutral) or 5A (no-neutral).

Available in neutral or no-neutral versions.

Smart Power Plug

Plug any other appliance into a smart power plug, and control that appliance with smart on/off controls.

Aqara Power Plug H2

The compact smart plug for Type G sockets. Plug an appliance into it, and let the smart plug turn the appliance on/off - through the app, on schedule, automation, or remotely. Supports real-time energy monitoring. Max load of 16A / 3680W.

Smart Wireless Controllers

These controllers are battery-powered and work wirelessly, sending Zigbee signals to control other smart devices, or activate scenes, based on the configurations you have set.

Aqara Cube T1 Pro

Flip, rotate, or tap to control your smart home devices or trigger scenes. Rotation can be assigned to smart light adjustments (e.g. dimming), or curtains. Each side of the cube can be configured for different devices or scenes. Integration with Apple HomeKit allows for control of other Apple Home devices.

Aqara Wireless Mini Switch T1

Small, battery-operated smart button that can be configured for smart control functions, such as smart switches, lights, curtains, air-conditioners; or used to trigger scenes. Supports single-, double-, and long-press. Can be mounted on walls or placed on tabletops for always-there controls.

Aqara Voice Mate H1

Privacy-first smart home controller. Mic only activates when picked up - otherwise, mic stays off on the table. Speak or whisper, no wake word needed. Slide, knock, or rotate for gesture controls. Requires an Aqara hub.

Other wireless controllers with 86 mm switch form factors are listed under Smart Switches.

Smart Curtains and Blinds

Give your window shades smart, motorized controls. Achieve automated opening and closing of curtains and blinds without lifting a finger. Create daily schedules, integrate your shades into scenes, have blinds react to temperatures in your home, or ask Siri or Google to control your curtains.

Motorised Curtain Controllers

Aqara Curtain Controller ZB

Curtain motor for use on specialized, professionally-installed motorised curtain tracks (see below). Very quiet operation; has a rated torque of 1.2 N/m that supports up to 50 kg. Wired, requires 230V power.

Aqara Curtain Controller C3

Curtain motor for use on specialized motorised curtain tracks (see below). Super quiet operation of 26 dB, with a rated torque of 2.0 N/m that supports up to 80 kg. Supports adjustable speed settings, potentially allowing for very quiet waking-up scenes. Wired, requires 230V power.

Motorised Curtain Tracks

Custom-Fabricated Tracks

Made to measure with sound-dampening liners for ultra-quiet operation. Custom fabricated for optimal functionality, durability, and minimal joints.

Track Assembly Kit

Join track sections to your required length. Multiple lengths and accessories included.

Extendable Track Kit

Telescopic track that extends to size. Available in 1.75–3.00m, 2.10–3.60m, and 2.50–4.50m.

	Max. Length	Centre-open	One-way-open	S-fold curtains	L-shaped tracks
Custom Fabricated Tracks	6.0 m	✓	✓	✓	✓
Track Assembly Kit	4.0 m	✓	✓	✗	✗
Extendable Tracks	4.5 m	✓	✗	✗	✗

Motorised Roller Shades and Blinds Systems

Aqara Roller Shade System

Complete roller shade system that consists of all the different components, including tubes, fixtures, and the Aqara Roller Shade Motor. Suitable for use on a wide range of roller shade systems, including roller blinds, combi blinds, and venetian blinds.

Aqara Vertical Blinds System H1

Complete vertical blinds system that can be drawn like curtains, with rotation control for the vertical blinds to achieve either sheer or dimout effects. Consists of tracks, fixtures, accessories, and the Aqara Vertical Blinds Motor H1. Includes a Bluetooth remote.

Retrofit Solutions

Retrofit solutions are devices that work with existing curtains and blinds, allowing for quick and easy mechanization and smart controls.

Aqara Curtain Driver E1

Battery-powered driver that can be easily mounted on your curtain tracks, then moves along the track, driving your curtains with it. Chargeable lithium-ion battery gives it up to one year of battery life. Requires two units for centre-open curtains. Available in Track version and Rod version. May not work with all curtains / tracks.

Aqara Roller Shade Driver E1

Gives smart controls to your existing blinds by mechanizing the existing beaded chain. Includes multiple attachments. Features a lithium-ion battery with up to 2-month battery life; or power permanently with a USB-C cable. Can be simply installed with included mounting tape or with screws. May not work with all blinds.

Smart Door Locks

Keeping your home safe has never been so simple and convenient. Aqara Smart Locks use the world's top technologies - including those from Apple - to give you key-free access; all while ensuring your security with robust encryption and intuitive controls.

Smart Home Integrations

Aqara Smart Door Lock D200i

Flagship smart door lock with a push-pull design and a fully automatic lockset. 3D facial recognition technology senses you on approach, scans your face, and unlocks your door in under 2 seconds. **Includes a spare battery.**

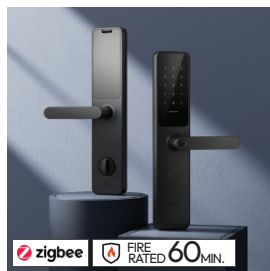

Biometric	Lock Type	Operation	Battery
Facial	Mortise	Fully-auto	Li-ion

Aqara Smart Door Lock D100

Smart push-pull door lock with a fully-automatic lock mechanism. The fingerprint scanner is intuitively placed where your thumb would naturally rest on the body, ensuring quick and easy access. **Includes 2 NFC cards.**

Biometric	Lock Type	Operation	Battery
Fingerprint	Mortise	Fully-auto	Li-ion

Aqara Smart Door Lock A100

Smart mortise door lock with fingerprint reader built directly on the handle, making unlocking one swift, smooth motion. The manual handle offers a familiar, intuitive user experience.

Biometric	Lock Type	Operation	Battery
Fingerprint	Mortise	Semi-auto	8 x AA

Aqara Smart Door Lock U500

Available in three different models - one for **metal gate** installations, one for **glass doors**, and a general purpose **rim lock**. All feature fingerprint, NFC card, app, and PIN unlock.

Biometric	Lock Type	Operation	Battery
Fingerprint	Rim	Semi-auto	4 x AA

Aqara Smart Door Lock U400

Hands-free unlock with iPhone or Apple Watch via UWB. Also supports fingerprint (0.3s), Apple Home Key, PIN, and NFC. Rechargeable battery, IP65 rated. **Includes 1 M100 hub.**

Available in Black or Silver.

Biometric	Lock Type	Operation	Battery
Fingerprint	Deadbolt	Semi-auto	Li-ion

Aqara Smart Door Lock U300

Single-latch smart lock that can be easily installed over locks with standard single-bore configurations. Perfect for giving interior doors convenient fingerprint access. Features an always-unlocked "Passage mode" button. **Available in Black or Silver.**

Biometric	Lock Type	Operation	Battery
Fingerprint	Single Latch	Semi-auto	4 x AA

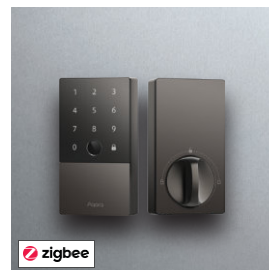

Aqara Smart Door Lock U200

Retrofit smart lock that can be installed over an existing lock easily. **Includes 1 NFC card.** Includes a wireless keypad with a fingerprint reader to unlock from outside.

Available in Black, Silver, or White.

Biometric	Lock Type	Operation	Battery
Fingerprint	Retrofit	Semi-auto	Li-ion; 4 x AAA

Aqara Smart Door Lock U100

Smart deadbolt door lock for wooden doors. Features a fingerprint scanner for secure, biometric unlocking. **Includes 2 NFC cards.**

Available in Shadow Grey or Silver.

Biometric	Lock Type	Operation	Battery
Fingerprint	Deadbolt	Semi-auto	4 x AA

Aqara Smart Door Lock U50

Smart deadbolt door lock, similar to the Aqara U100 - except that it lacks a fingerprint reader and does not include the extra accessories.

Only available in Black.

Biometric	Lock Type	Operation	Battery
Nil	Deadbolt	Semi-auto	4 x AA

Aqara Smart Door Lock B50

Retrofit smart deadbolt - fits right over your existing lock. Unlock with PIN, app, or voice. Built-in Wi-Fi 6, no hub needed for basic control.

Biometric	Lock Type	Operation	Battery
Nil	Deadbolt	Semi-auto	4 x AA

Smart Sensors & Detectors

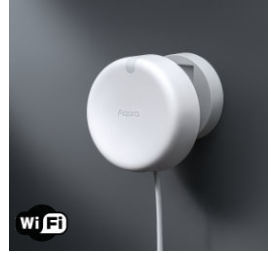

Smart sensors monitor changes in your home and can trigger automations, notifications, or alarms. Real-time and historical data is reported to your smart home app, such as Aqara Home or Apple Home.

Aqara Presence Sensor FP300

Combines infrared (PIR) with mmWave sensing technologies to deliver accurate and responsive motion and presence detection. Also features independent light, temperature, and humidity sensors.

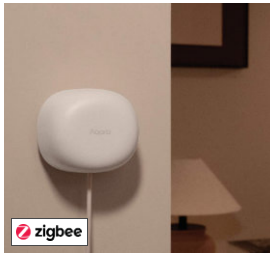

2 x CR2450 batteries; 2-year battery life (Thread); 3-year battery life (Zigbee).

Aqara Presence Sensor FP2

mmWave sensor that maps zones in your room and detects occupancy (and absence) in each zone, enabling smart, location-based automations. Even detects stationary people. Connects to Wi-Fi (2.4GHz only).

Must be plugged in to power (USB cable included; plug not included).

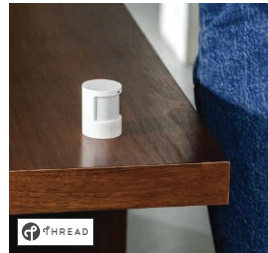

Aqara Presence Sensor FP1E

mmWave sensor that can detect occupancy (and therefore, absence) in the room, with a detection range of 6m and angle of 120°.

Sensitive enough to detect stationary individuals, such as those sitting or sleeping.

Requires wired power (USB cable included).

Aqara Motion & Light Sensor P2

Matter-compatible Thread device with two fully functional sensors in one – PIR motion sensor and illumination sensor. Each sensor can separately trigger different automations and notifications.

2 x CR2450 batteries; 2-year battery life.

Aqara Motion Sensor P1

Tiny motion sensor with a five-year battery life. Includes a fully rotatable stand with an adhesive pad, so you can stick it anywhere. Uses passive infrared sensors (PIR) on a wide angle lens to detect human motion, which can be used to trigger automations.

2 x CR2450 batteries; 5-year battery life.

Aqara Door & Window Sensor T1

Tiny contact sensor that reports real-time statuses of doors and windows. Can be used to trigger alarms and send notifications.

Also supports home automations, such as turning on lights when a door is opened.

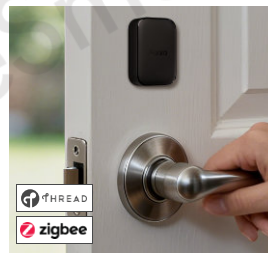

1 x CR1632 battery; 2-year battery life.

Aqara Door & Window Sensor P2

A Matter-compatible contact sensor based on Thread to detect the opened / closed state of doors and windows. Triggers automations and notifications.

1 x CR123A battery

Aqara Multi State Sensor P100

One compact sensor detects opens, closes, vibrations, taps, tilts, and drops. Works on doors, windows, drawers, and appliances. Zigbee + Matter over Thread.

1 x CR2450 battery; 2-year battery life.

Available in White or Black

Aqara Vibration Sensor T1

A sensor to detect vibrations, movements, tilts, and drops at home – which can trigger automations, notifications, or your security system. Can be placed on objects and fixtures, such as prized artworks, safe doors, or on washing machines.

1 x CR2032 battery; 2-year battery life.

Aqara Climate Sensor W100

Sensor that detects and displays temperature and humidity, and can also display a secondary sensor's reading on its screen. Buttons on the sensor can control a linked Aqara Hub M3 air-conditioner device.

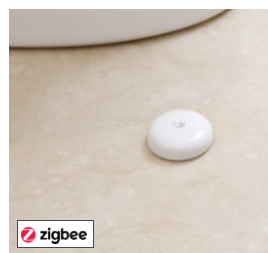

2 x CR2450 batteries; 2-year battery life.

Aqara Temperature and Humidity Sensor T1

A temperature, humidity, and air pressure sensor that reports and logs statuses to your smart home system. Can be used to trigger notifications and automations.

1 x CR2032 battery; 2-year battery life.

Aqara Water Leak Sensor T1

A sensor to detect water leakages as they occur, giving you an early warning system against property damage from floods or excess water. Can be used to trigger a critical alert in Apple Home or Aqara Home app. Rated IP67.

1 x CR2032 battery; 2-year battery life.

Aqara Smoke Detector

Smoke detector with a 90 dB siren that can be integrated into your smart home, giving you remote notifications. Alarm will work regardless of hub connection. Supports Apple HomeKit Critical Alerts.

1 x CR17450 battery; 10-year battery life.

Aqara Gas Detector

Smart sensor to detect gas leakages in the home. Equipped with a 85 dB siren; also sends remote notifications when connected to smart home. Only works for methane; does not work for LPG.

Requires wired power (adapter included).
