

Water worth drinking.

Filtering that removes what you can't see, and serves it hot, cold or sparkling, straight from the tap.

velta.sg

Tap water looks clear. It isn't always clean.

Singapore's water is treated and safe to drink, but on the way to your tap it can still pick up chlorine, traces of metals and particles too small to see or taste. None of it is necessarily harmful. It's just the everyday things you'd rather not drink. Velta filters them out, so what's left is simply clean water.

WHAT'S REALLY IN THE TAP WATER

Chlorine & chloramine	taste & odour
Lead & heavy metals	dissolved
Microplastics	(<5 mm)
PFAS "forever chemicals"	persistent
Pesticides & VOCs	organic
Bacteria & viruses	microbial
Medication traces	residual

Velta's reverse osmosis membrane filters down to 0.0001 µm, fine enough to reduce the contaminants listed above.

A HIDDEN THREAT

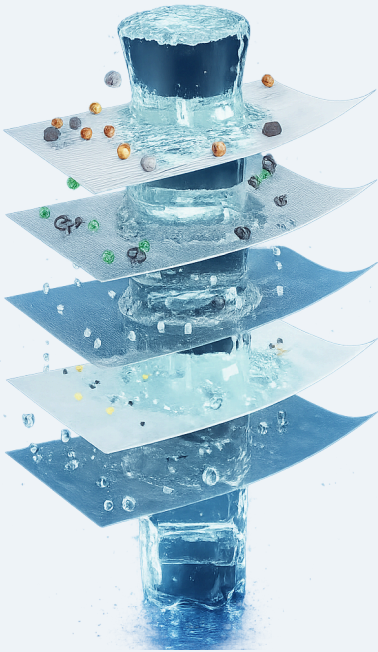

Microplastics are now in almost everything we drink.

Microplastics and nanoplastics carry toxins, hormone disruptors and heavy metals. If your filter can't catch them, your body takes them in a little at a time. Cleaner water means less for your body to process.

0.0001 µm Velta's RO membrane blocks particles far smaller than any microplastic.

Five stages, one pure glass.

Every drop passes through five filtration stages, each removing what the last left behind — down to 0.0001 µm at the RO membrane, fine enough to catch dissolved metals, PFAS and microplastics.

WHAT IT TAKES OUT

- Microplastics
- PFAS
- Lead
- Chlorine
- Pesticides
- Bacteria
- Viruses
- VOCs

BUILT CLEAN

- BPA-free
- Silicone-free
- Self-twist filters
- NSF-compliant parts

NSF-compliant components, tested and food-safe throughout.

WHY PEOPLE CHOOSE VELTA RO

- 01

It removes up to 99.9% of contaminants

Reverse osmosis takes out microplastics, metals, bacteria, viruses, PFAS and chlorine.
- 02

Trusted worldwide

The same membrane technology trusted in medical and food-grade applications.
- 03

Hydrogen-ready

Ultra-low TDS water, ideal if you add a hydrogen wellness system later.
- 04

Easy to live with

A live TDS display, auto-flush and tool-free twist filters.

HydroSpark+

Fresh sparkling purified water,
straight from your tap.

AVAILABLE IN 2 PREMIUM FINISHES

● Arctic White ● Graphite Grey

SPARKLING COUNTERTOP

WHY YOU'LL LIKE IT

Four ways to enjoy purified water

Sparkling, hot, cold or ambient. Pick the fizz and fill size on the dial, no kettle and no bottles.

Sparkling water, made purer

It carbonates after filtering, so the fizz is crisp and the water underneath is genuinely clean.

Easy to use

A weighted control knob and a clear 4.3" screen.
Winner of the German Design Award.

 95° HOT	 85° WARM	 45° LUKEWARM	 25° AMBIENT	 5° COLD	 SPARKLING
---	--	--	---	---	--

SPECIFICATIONS

Model No	HydroSpark+ (VS-10)
Filter System	NanoPure™ 4-in-1 Composite RO Filter
Temperature Range	Hot, cold, ambient or sparkling · 4–95°C
Heating Power / Output	2,200 W · 18 L/h · instant hot water
Cooling Power / Output	2,250 W · 2.4 L/h · 4–8°C
CO ₂ Cylinder	0.6 L (replaceable)
Sparkling Capacity	up to 100 cups of 330 mL
Presets	150 / 300 / 500 mL
Water Tank Capacity	5 L tank or pipe-in
Dimensions (D×W×H)	220 × 508 × 436 mm · 25.5 kg
Filter Lifespan	4,000 L or 2 years
Power Supply	220–240 V · 50 Hz
Warranty	24 months · parts & labour

HydroForm+

Hot, cold, or just right, to the degree, in a couple of seconds.

AVAILABLE IN 2 PREMIUM FINISHES

● Carbon Black ● Stellar White

 99° HOT	 85° WARM	 45° LUKEWARM	 25° AMBIENT	 5° COLD
---	--	--	---	---

COUNTERTOP SERIES

WHY YOU'LL LIKE IT

Any temperature you want

99°C for cooking, 85°C for coffee, 45°C for a baby's bottle. Set it to the degree on the touch panel.

Clean inside and out

Tankless, BPA-free and silicone-free, with UV at the spout. Nothing sits around going stale.

Real-time information at a glance

Live TDS display, self-rinse and a filter-life reminder, all on screen.

SPECIFICATIONS

Model No	HydroForm+ (HF-20)
Filter System	Dual Composite (PAC + RO & ACF)
Temperature Range	Hot, cold or ambient · 5–99°C
Heating Power / Output	2,100 W · instant hot water
Cooling Power / Output	140 W · 1.5 L/h
Tank	Tankless · piping required
UVC LED Sterilisation	2.5 W
Dimensions (D×W×H)	425 × 180 × 380 mm · 7.3 kg
Filter Lifespan	RO & ACF: 2,100 L or 1 year
Power Supply	220–240 V · 50 Hz
Warranty	24 months · parts & labour

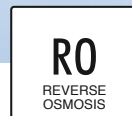

HydroView+

The whole system lives out of sight beneath your sink.

AVAILABLE IN

- Graphite body with chrome faucet.

UNDER-SINK RO

WHY YOU'LL LIKE IT

Proof in every glass

A live TDS display shows exactly how clean each glass is, every single time.

Two streams, one faucet

Pure drinking water from one lever, and a clean rinse stream for fruit and veg from the other.

Wellness-ready

Water with ultra-low total dissolved solids, ideal if you'll pair it with a hydrogen system down the line.

SPECIFICATIONS

Model No	HydroView+
Filter System	NanoPure™ 5-Stage RO · 0.0001 µm
Temperature Range	Pure drinking + rinse · dual-outlet · 5–45°C
Cooling Power / Output	90 W · 2.1 L/min · 800 GPD purified
Tank	Tankless · piping required
TDS reduction	> 95%
Dimensions (D×W×H)	381 × 165 × 435 mm · 7.8 kg
Filter Lifespan	CF 4,000 L / RO 8,000 L CF 1 year / RO 2 years
Power Supply	220–240 V, 50 Hz
Warranty	24 months · parts & labour

WHICH ONE'S FOR YOU

Pick the Velta that fits your kitchen.

All three filter down to 0.0001 µm. The difference is where they're installed and the features you want. Here's the short version — our team can talk you through it in the showroom.
